

11. Congress of Harmonical Frequency Procedure

With great pleasure the Academy of Harmonical Frequency Procedure announces its online congress on May 21-22, 2022.

The following lectures await you:

Treatment of stress-induced depressed mice with Harmonical Frequency Procedure

Prof. Dr. Mehmet Tuğrul CABIOĞLU, Cyprus Ada Kent University, Gazimağusa, Cyprus

This study was carried out to determine the effects of specific treatment with Harmonical Frequency Procedure on stress-induced depression in mice. For this purpose, behavioral tests as well as histopathological examinations were considered.

Smoking Cessation - impressive results of a study with Harmonical Frequency Procedure

Prof. Dr. Yeltekin DEMIREL, Cumhuriyet University Hospital, Sivas, Turkey

Oğuz Mert Demir, Sanem N. Karaca, Yeltekin Demirel Department of Family Medicine, Cumhuriyet University Hospital, Sivas, Turkey

Prof. Dr. Demirel presents the study of Cumhuriyet University Hospital, Smoking Cessation Center. It is based on a smoking cessation protocol with the Trikombin and it evaluates the results of the therapy according to severity and length of the addiction.

The successful treatment of Post Covid Syndrome with the Harmonical Frequency Procedure

Dr. Sümer Zeynep KARABEY, Kuşadası-Aydın, Turkey

Dr.med. Karabey is a member of the scientific advisory board of the Academy and will again this year share her accumulated experience with our participants with a usual practical and highly topical contribution. In this lecture, Dr. Karabey will present her therapeutic protocol for the treatment of Post-Covid Syndrome and discuss it using case examples. Dr. Karabey will discuss the exact approach used in her practice that has led to success.

Recognizing and interpreting correlations between anamnesis and Harmonical Frequency ranges

Naturopath Alan E. BAKLAYAN, Munich

Naturopath Baklayan will discuss by means of examples how already on the basis of a careful anamnesis the appropriate meridians and structural vessels - following the logic of the Harmonical Frequency System - are offered. This lecture also contains valuable experiences from daily practice that can be integrated immediately.

Case studies of proven therapeutic approaches for autoaggressive patients

Naturopath Jürgen VOLLMER, Hanover

Patients with autoaggressive autoimmune diseases can be treated well with the Trikombin. Naturopath Vollmer will present his proven therapeutic approaches and experiences on this topic.

How emotions influence our molecules

Christian PROCHASKA, Tulln, Austria

In this lecture, Mr. Prochaska will explain how the Trikombin can be used to decipher the path from the feeling (stress) to the disease symptom and to have a targeted therapeutic effect on the individual stations. In addition to the topics of stress axis, silent inflammation up to the strategies that our immune system uses to be active and also to remain active are dealt with in this lecture.

Using constitutional predispositions to solve puzzling disease patterns

Naturopath Alan E. BAKLAYAN, Munich

Often seemingly contradictory symptoms of the patient puzzle the therapist. A look at the constitutional predisposition often offers a conclusive resolution to the case. In this lecture, therapy strategies with the Harmonical Frequency Procedure and corresponding prescriptions will be discussed.

Successful use of Harmonical Frequencies for chronic complaints and acute pain

Burak KILIC, Warszawa Mokotów, Poland

In the first part of the lecture various chronic diseases will be discussed, which were either not recognized by classical medicine, unsuccessfully treated with medication or classified as psychosomatic due to lack of improvement. In an overview, the patient's history so far, the Trikombin diagnoses made, courses of therapy and the final results will be presented.

The second part of the lecture will focus on the regulatory use of Harmonical Frequencies in acute pain. Examples will be discussed, ranging from simple headaches, migraines, to abdominal, muscular, back, shoulder, and lung pain, where the patient's acute condition could be completely or partially alleviated.

The influence of jaw and teeth status on health

Agni WAGNER, Stuttgart

- What and how can this be tested with the Trikombin?
- Which testing kits and ampules are important here?
- Different treatment options and resulting cooperation with oral surgeons, dentists, physicians and alternative practitioners
- Case studies

Harmonical frequencies in trauma diagnosis, management and treatment

Dr. hab. Renata SOLARSKA, Warszawa, Poland

Patients with post-traumatic experiences face the lack of comprehensive guidelines for diagnostics and treatment. Different and non-specific psychic or somatic symptoms lead to diagnoses which fail to help the patients feeling better and relieving him of chronic symptoms. And his problem even gets more profound.

Therefore, the objective of the presentation is to show how to use and apply the harmonical frequencies to diagnose and to guide trauma patients to healthy performance. The harmonical frequencies will be shown as a diagnostic tool which allows to reach/access the blocked emotions and recognise the illness path propagation.

The role of harmonical frequencies in healing of celiac disease, Ekbohm Syndrome and sinusitis triggered by past traumatic episodes will be presented and discussed.

Successfull treatment of difficult disease cases with systematics and DTS® testing kits

Naturopath Axel FORSTNER, Munich

Treatment with the Trikombin offers us many different effective therapy approaches. One of these is the systematic work with the ampules of the DTS® testing kits, the Differential Test Systematics, with which we can often achieve excellent results even in very difficult-seeming disease cases.

In his lecture, naturopath Forstner will present to you cases that normally seem difficult or unsolvable, which have been successfully solved by means of systematic testing using the DTS testing kits: From 30 years of existing, stressful heartburn to autoimmune reactive polymyalgia rheumatica with development of painful rheumatoid arthritis, for the treatment of which orthodox MTX was advised, to neurodermatitis of a three year old child, which worsened for over a year despite various therapy attempts, as well as successful ampule therapies of cat hair allergies.
